

LifeLens

*Intelligent Situation Monitoring-
Know Your Team & Their Surroundings*

Body-Worn Safety Camera

LifeLens is designed to ensure individual safety and accountability on any jobsite, anywhere. LifeLens clips to a work safety vest or jacket, and with the press of a button it will give you 10 hours of use on a full charge. See what your team is seeing in real time and make educated and informed decisions. Issue emergency directives or evacuation orders as needed with 2-way audio from a secure 4G/LTE cellular connection. Generate EOD reports on activity via our desktop VMMS software.

Control Emergency Situations Remotely

With LifeLens, teams, decision makers and authorities can confidently navigate dangerous situations remotely, empowering them to assess the situation and make educated decisions. Safeguard the well-being of your team and jobsites with our body safety cameras.

LifeLens is available as a single unit or a set of 8 with a standard docking station. Charge your cameras and use 7" color touch screen to view the recorded video and download the data to the on-board hard drive. Compatible with a keyboard and mouse for ease of use.

About AI Site Cam

We are a leading provider in the technology and security camera systems industry, specializing in innovative solutions for construction site monitoring.

AI Site Cam allows for real time access to site progress, archival footage, and enhanced security measures, all accessible through your mobile device or desktop PC.
