

# WeatherSense Pro

*Precision Weather Data for  
Every Job, Everywhere*

## Portable Jobsite Weather Station

WeatherSense Pro seamlessly connects to your mobile device via WiFi and Bluetooth, giving you real-time weather data and alerts whenever you need it, whether you're on a job site, or out in the field. Customize the alert system to monitor for extreme conditions like high winds or heavy downpours.

## Stay One Step Ahead of Weather

WeatherSense tracks a comprehensive suite of environmental conditions, from temperature and humidity to wind speed/direction, barometric pressure, rainfall, and even lightning strikes.

With wireless connectivity and a user-friendly mobile app, you can view current conditions, track trends, and get customizable alerts for things like high winds, heavy rain, or approaching storms.

With its robust data logging capabilities, you can analyze historical trends and optimize your planning and operations.

## About AI Site Cam

We are a leading provider in the technology and security camera systems industry, specializing in innovative solutions for construction site monitoring.

AI Site Cam allows for real time access to site progress, archival footage, and enhanced security measures, all accessible through your mobile device or desktop PC.
