

# MachineGuard HD

**Featuring IP69K Rated w/ AI  
Image Stabilization Processors**

## Heavy Equipment Safety Camera System

MachineGuard HD is a heavy equipment safety camera system designed to eliminate blind spots and enhance safety on your job site. MachineGuard HD enhances operational efficiency and safety in construction and aerial photography by providing real-time, high-resolution imagery from various vantage points, whether from a crane for capturing expansive footage or from construction equipment to improve visibility and reduce blind spots for operators.

### AC Power w/ Solar & Cellular Options

With 2.4GHz wireless transmission, this system connects seamlessly to a 10" cab split screen monitor, allowing you to link up to four cameras at once. The 36x optical zoom, powered by a Sony image sensor, ensures you can zoom in on important details with clarity.

The self-leveling gravity bracket and anti-vibration mount enhance stability and reliability. Power options include a 12VDC connection or optional 10-hour rechargeable battery packs, giving you flexibility in various environments. Enhance safety and documentation by capturing comprehensive views from all angles—forward, backward, and overhead.

### About AI Site Cam

We are a leading provider in the technology and security camera systems industry, specializing in innovative solutions for construction site monitoring.

AI Site Cam allows for real time access to site progress, archival footage, and enhanced security measures, all accessible through your mobile device or desktop PC.
